## The Professional's Choice

### WET LOOK SEALER for Wood and Masonry

Rainguard, The Professional's Choice Wet Look Sealer for Wood and Masonry with Micro-Lok Technology creates a penetrating clear waterproofer that provides a long lasting gloss finish to the applied surface. Micro-Lok is an exclusive ingredient that creates a micro-molecular chemical and mechanical bond between the waterproofing chemicals and the surface to which it has been applied. The Professional's Choice Wet Look Sealer has also been formulated with regard to the environment with no volatile ingredients or cancer causing chemicals.

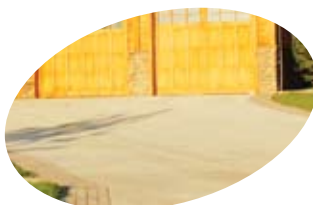

Rainguard, The Professional's Choice Wet Look Sealer for Wood and Masonry is great for:

- Provide a beautiful "wet look" glossy finish to stained or unstained decorative patios
- Long lasting protective barrier for surfaces that will not yellow
- Achieves even higher gloss look after multiple applications
- Excellent wear and abrasion resistance – great for garage floors
- Avoiding nasty mold & mildew growth on the surface film
- Keeping patios cleaner by stabilizing the joint sand, not allowing weeds to grow up through the joints
- Making planters and flower pots stand out and look great longer

Rainguard International is a family run manufacturer of products that are designed to provide protection to concrete and wood surfaces. Since the 1960's, Rainguard coatings solutions have been applied on projects throughout the world, ranging from Wal-Marts, to large infrastructure facilities, to the Athens Olympics, to multi-family and single family residences. We have developed scientifically proven formulations for both horizontal and vertical substrate applications; including an extensive line of masonry water repellents and sealers, elastomeric coatings, masonry stains and anti-graffiti products for the professionals, making them The Professional's Choice.
